Deck Neo

Ultra-Smooth Performance: Powered by Vapor Acceleration Protocol with capture up to 4K@120 fps for seamless multitasking and high-performance workloads.

Reliable & Future-Ready: Includes a 3-year warranty (extendable to 5 years) with regular OTA updates for security and new features.

Built to Last: Embedded architecture ensures long-term reliability and extended device lifespan.

The Deck Neo is a compact, cost-effective thin client that connects to powerful on-premise or cloud servers, eliminating the need for built-in processing power.

Its exceptional **cost-effectiveness**, **low power consumption**, and **high performance** make it an ideal choice for a wide range of applications.

✓ Cost-Effective

✓ Superior Performance

✓ Scalability

✓ Security-Centric

Reduction in maintenance and energy costs

Deck Mini

The Deck Mini is a compact and powerful Mini PC. TheDeck Mini offers a revolutionary solution, packing powerful computing performance into a sleek, space-saving design.

Customizable Performance

Choose Intel Core or AMD Ryzen processors with flexible RAM, storage, and I/O options tailored to your needs.

Smart Cooling & Easy Maintenance

Available in active or silent passive cooling models, with tool-free access for quick upgrades and minimal downtime.

Great Value

Delivers top-tier performance and flexibility at a highly competitive price, outperforming leading mini PC brands.

Deck Studio

The Deck Studio **All-in-One PC** delivers a perfect blend of power and elegance, uniting the performance of a full-fledged desktop with the sophistication of an ultra-high-quality monitor in a single, streamlined unit.

Its sleek, minimalist design not only elevates any workspace but also promotes focus and productivity by reducing clutter.

With everything integrated into one seamless device, you can enjoy a clean, modern aesthetic that enhances comfort, efficiency, and the overall computing experience.

Highly Customizable & Powerful: The Deck Studio goes beyond typical all-in-one PCs, offering a range of pre-configured options or fully customizable specifications—including processor, memory, storage, and connectivity—to perfectly suit your workflow and performance needs.

Immersive Visuals and Audio: Featuring a stunning high-resolution display paired with dual high-quality speakers, the Deck Studio delivers crystal-clear visuals, rich sound, and powerful performance, ideal for both productivity and entertainment.

Efficient Cooling & Easy Maintenance: With options for high-performance active or silent passive cooling, plus tool-free access to internals for quick upgrades and diagnostics, the Deck Studio ensures optimal efficiency, minimal downtime, and long-term reliability.

SecureGate Firewall

The SecureGate Firewall is a powerful and flexible network security solution engineered to protect your digital infrastructure. Offered in three models—4-port, 6-port, and 8-port—it leverages the robust Pfsense® platform to deliver reliable and comprehensive security.

Scalable Performance & Flexible Deployment

The SecureGate Firewall delivers smooth, hardware-limited performance, allowing unlimited users up to the system's capacity. Its adaptable design makes it ideal for everything from SMBs to large enterprises, integrating seamlessly into existing networks.

Cost-Effective & No Recurring Fees

With a one-time investment, the SecureGate Firewall offers lifetime usage without annual subscription costs, eliminating the recurring expenses common with other firewall solutions.

Advanced Firewall OS

Built on the robust OPNsense platform and enhanced with enterprise-grade optimizations, it provides reliable, high-performance protection for your digital infrastructure.

HyperNAS

The HyperNAS is a powerful solution that helps businesses simplify data management and foster seamless collaboration. By centralizing file storage, it eliminates scattered data and provides your team with easy, organized access to critical information.

Robust security features protect sensitive data, while automatic backups ensure reliable disaster recovery, offering complete peace of mind.

Combining user-friendly design with cost-effective, high-performance storage, the HyperNAS is the ideal choice for businesses looking to optimize their data infrastructure and unlock new levels of efficiency.

Scalable Bay Options

Available in 2, 4, 8, and 12-bay configurations, allowing businesses to start small and expand storage as their needs grow.

Scalable & Flexible Deployment

Suitable for SMBs to large enterprises, with easy integration into existing network infrastructures for seamless expansion.

Enterprise-Grade Performance

Optimized for virtualization, backups, media storage, and data analytics, ensuring reliable and efficient operation under heavy use.

Advanced Data Protection

Built-in redundancy, RAID support, and snapshot features safeguard data and enable quick recovery in case of failure.

PXL Interactive Panel

The PXL Interactive Panel delivers the power of touch on a vivid, lifelike display, combining color accuracy, rugged durability, and multiple size options—making it the perfect solution for classrooms, meeting rooms, and interactive environments.

Multiple Size Options

Available in 55", 65", 75", 85", and 110" to perfectly fit classrooms, offices, or large venues.

High-Endurance Screen

Designed for longevity with 50,000+ hours MTTF, ensuring reliable performance for years.

Vibrant, True-to-Life Colors

Delivers super real color reproduction for impactful presentations, immersive learning, and seamless collaboration.

Rugged & Durable

Shock-resistant and impact-tested to withstand demanding, high-traffic environments.

Vapor Gateway

Securely access your computers and servers remotely, on-site, with multiple connection types and simple, safe management.

Secure Remote Access

Establish encrypted connections to RDP, VNC, SSH, Telnet, and other protocols from any location.

Browser-Based Connectivity

Launch remote sessions directly through a web browser without client installation or configuration.

On-Premise Deployment

All data and authentication remain on-site, ensuring full control and compliance.
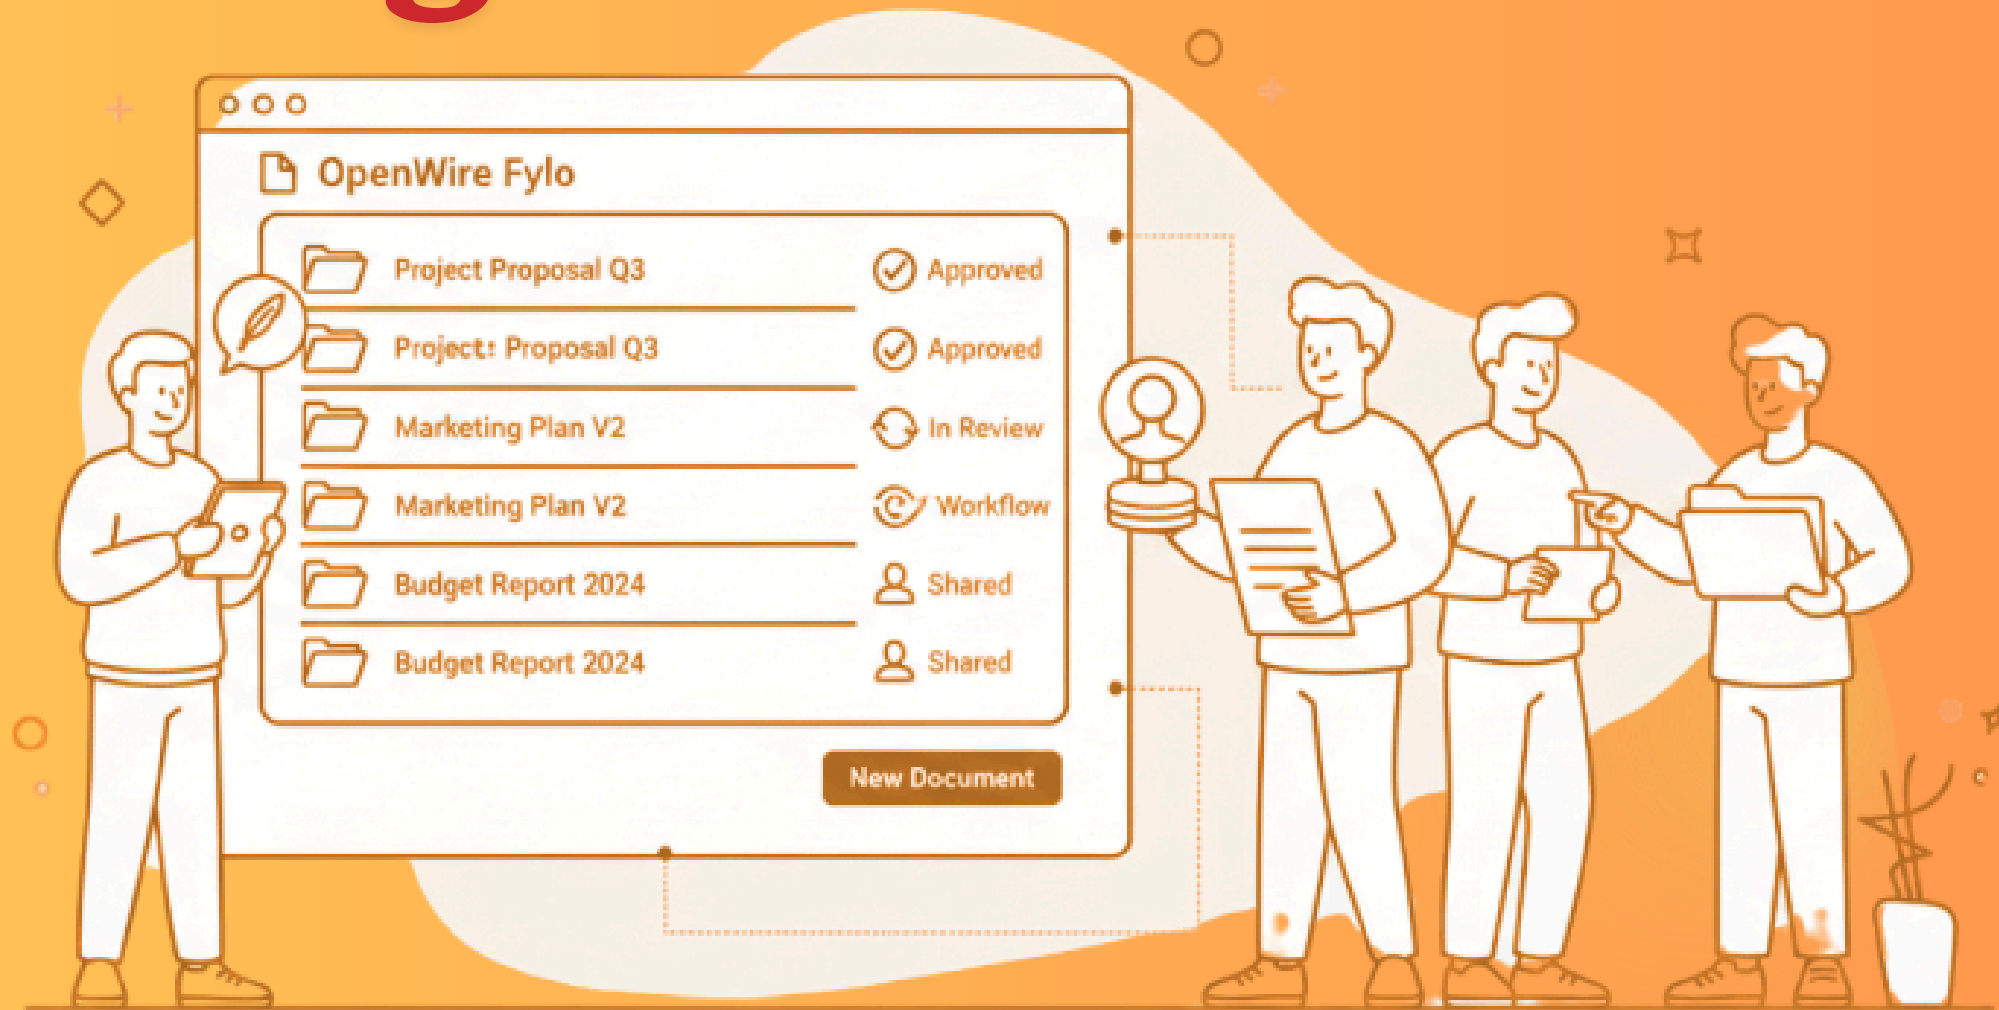

Centralized Management

Streamlined user provisioning, session monitoring, and access control for efficient administration.

Fylo Document Manager

Fylo is a collaborative document management system that streamlines file organization, approval workflows, and secure sharing within enterprises.

Centralized Document Management

Store, organize, and control documents in a unified platform for easy access.

Collaborative Workflows

Enable team reviews, approvals, and version tracking to simplify document lifecycles.

Secure Access Control

Role-based permissions and audit trails ensure data integrity and compliance.

Browser-Based Access

Access, edit, and share documents directly from a web browser, no additional software needed.

SecureGate Browser

Securegate Browser is a hardened, enterprise-grade web browser designed to provide secure, policy-driven access to the internet and internal web applications.

Secure Web Access

Enforces safe browsing with built-in threat protection, blocking malicious sites and phishing attempts.
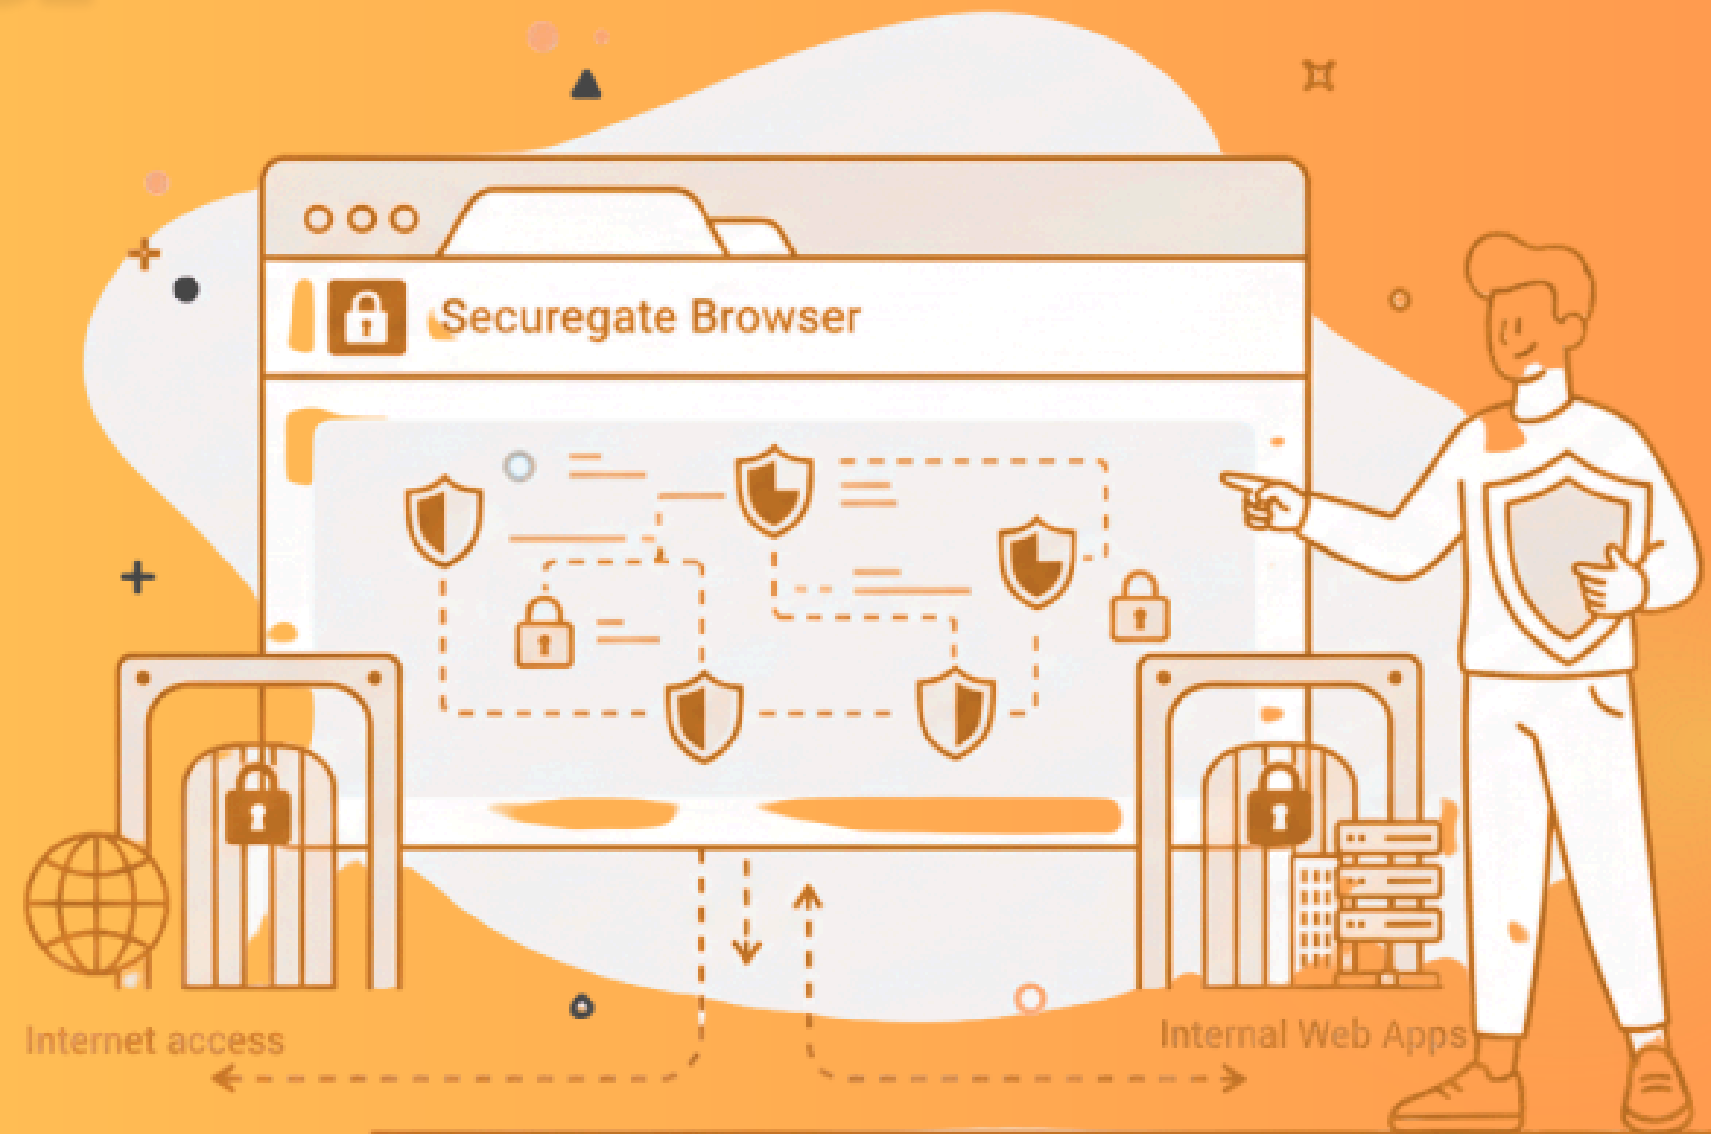

Policy-Driven Control

Centralized management of user permissions, whitelists, blacklists, and browsing policies.

Enterprise Integration

Works seamlessly with Securegate Firewall and Vapor Gateway for unified security.

Browser-Based Simplicity

No complex setup—just open the browser and use, with enterprise-grade protection running in the background.

Endpoint Manager

Endpoint Manager is a unified endpoint management platform that simplifies device control, monitoring, and security across your organization.

OpenWire Endpont Manager
Unified Device Control, Monitoring & Security

Unified Endpoint Control

Manage, configure, and monitor all endpoints from a single centralized dashboard.
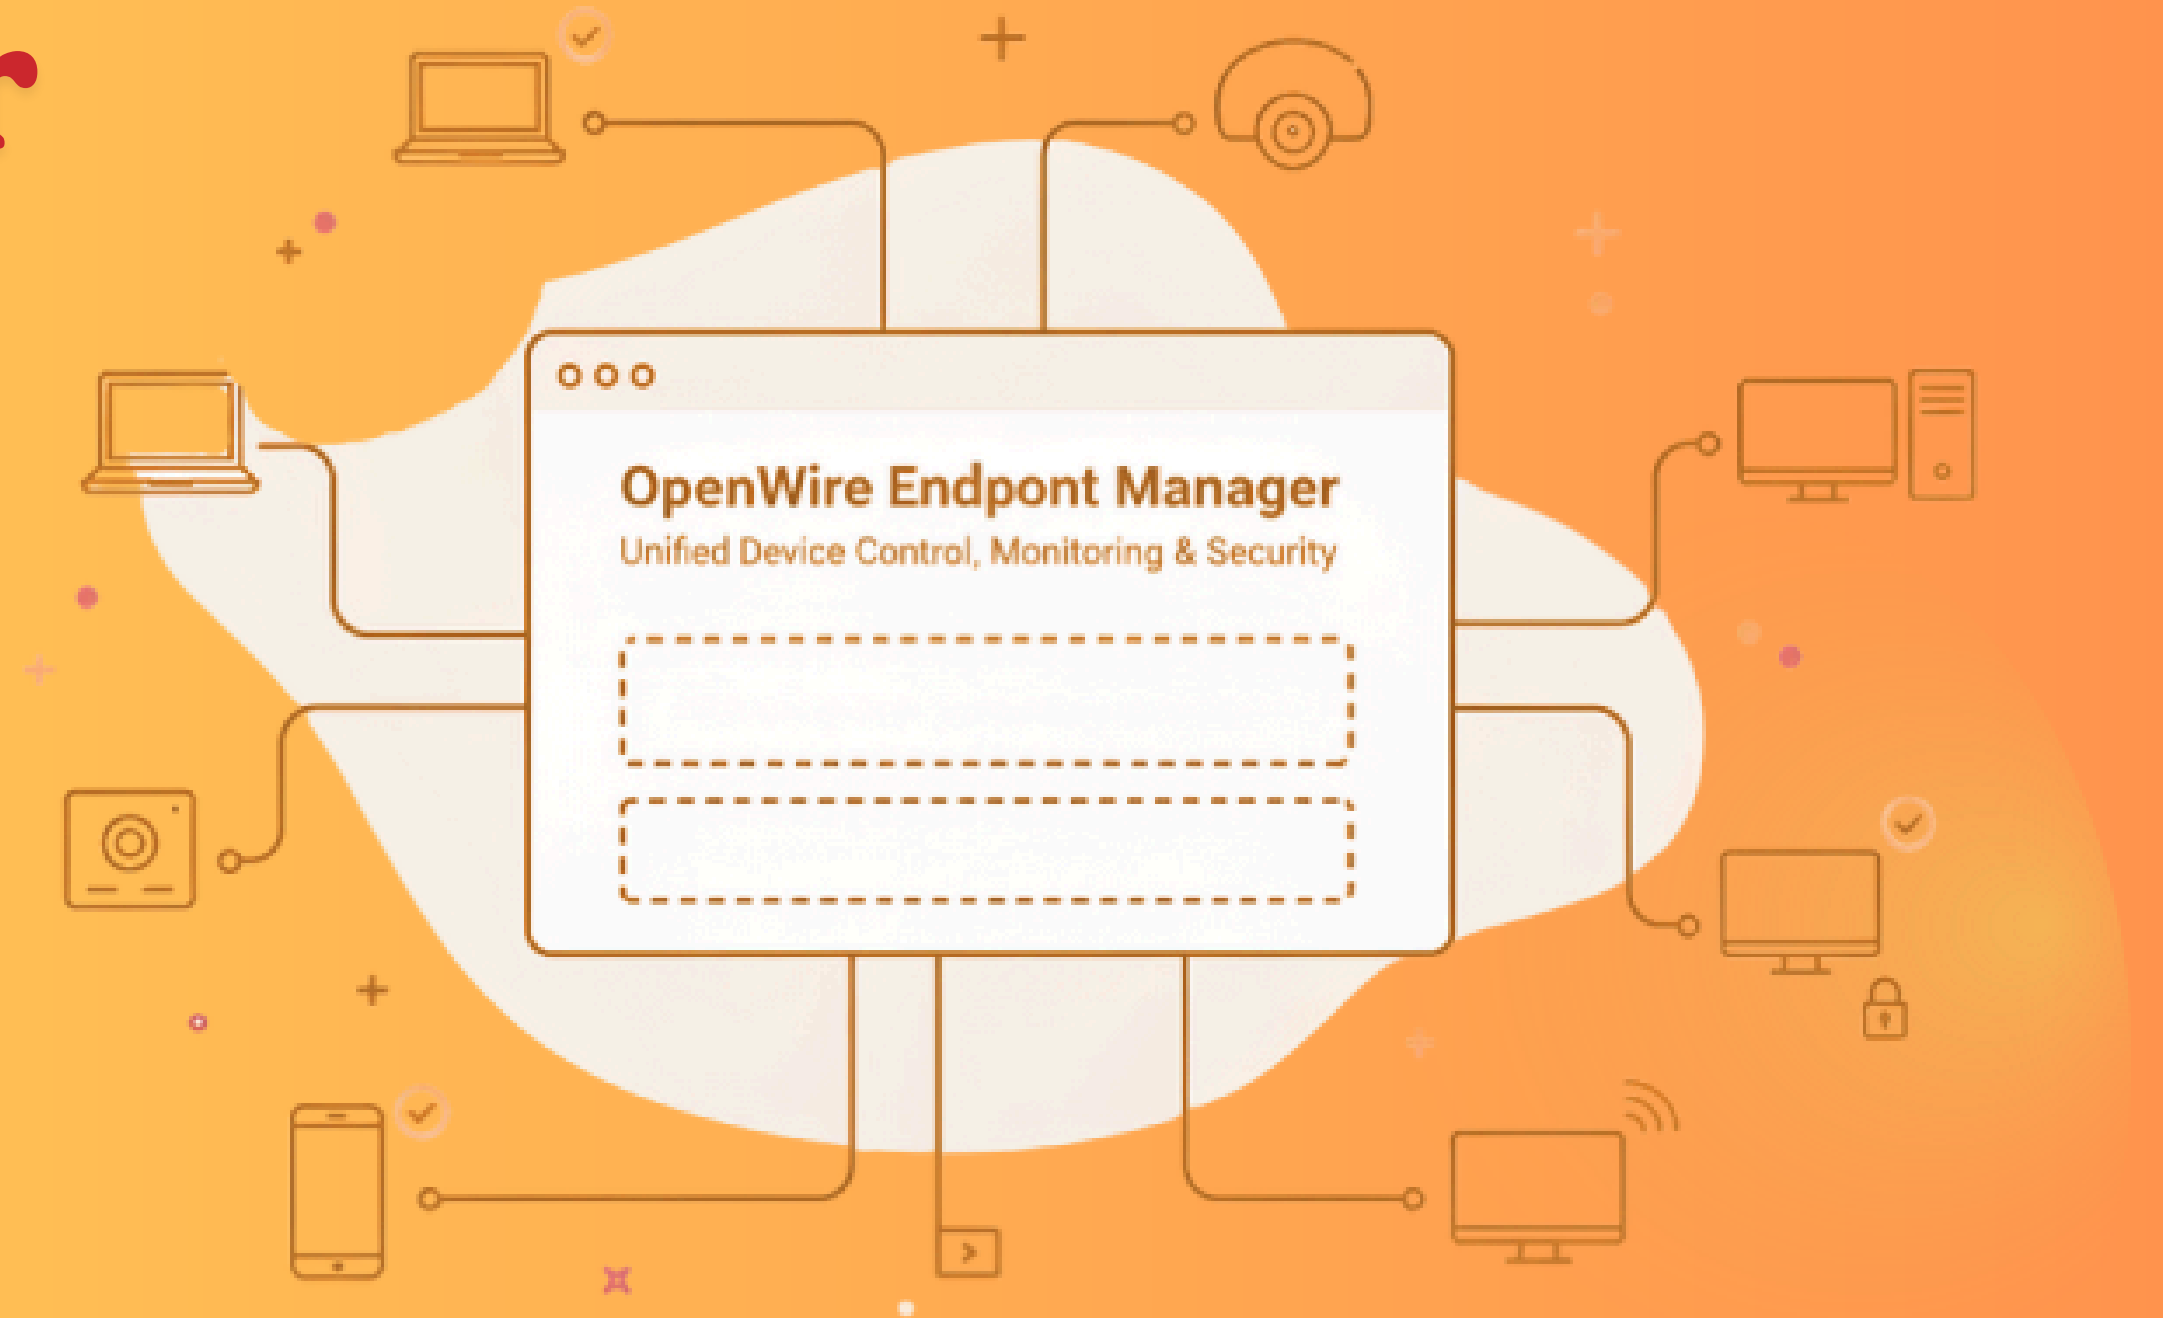

Policy & Application Management

Deploy applications, enforce policies, and maintain compliance across all connected devices.

Secure Remote Access

Enable administrators to troubleshoot, update, and support devices remotely with enterprise-grade security.

Included with Deck Mini PCs

Bundled at no additional cost with Deck Mini PCs, providing seamless integration out of the box.
